Education

SRM University – Trichy (8.5 GPA)

Bachelor of Technology in Computer Science Engineering

2023 – 2027

Trichy, Tamil Nadu

Projects

AI–Powered Recruitment Automation Platform / React, TypeScript, Supabase, Google Gemini API

- Built an AI-powered analytical platform automating screening of 100+ resumes with 90%+ accuracy using semantic scoring models — delivering data-driven candidate ranking and predictive hiring insights.
- Designed a PostgreSQL database with AI score caching; developed recruiter dashboard with real-time analytics, duplicate detection, and automated reporting — following Agile development practices.

Production–Grade LLMOps Pipeline / Python, FastAPI, Docker, AWS EC2, PostgreSQL

- Built a production-grade data pipeline executing 100+ prompts automatically, generating structured analytical scores for accuracy, clarity, and hallucination risk — enabling predictive quality assessment.
- Deployed a Dockerized FastAPI backend on AWS EC2 with fault-tolerant retry logic and PostgreSQL-based versioning system; authored technical documentation for deployment architecture and execution tracking.

SoundScout – AI Smart Glasses for Accessibility / Python, IOT, Machine Learning

- Built an AI-powered smart glasses system using deep learning models to detect surroundings and deliver real-time audio and haptic feedback for visually and hearing-impaired individuals.
- Integrated IoT sensors with ML-based object recognition pipeline to enable environment-aware assistance with low-latency response for real-world usability.
- Documented full system architecture and IoT-ML integration pipeline for hardware-software deployment.

Achievements

- **EPICS in IEEE Grant Recipient (2026)** Awarded **\$1,510** for the project *“SoundScout: AI-Powered Smart Glasses with Haptic Feedback for visually and hearing-impaired individuals.”*
- **Top Performer – Noobtron Hackfest** Recognized among the top teams out of **170+ teams (850+ participants)** and awarded **5,000 + Medal** for developing an AI-powered recruitment automation platform.

Technical Skills

Languages: Python, JavaScript, SQL, C#, Java

Data & Analytics: PySpark(Exposure), Hadoop(Exposure), Data Visualization

Frontend: React, Tableau, Power BI

Backend / Cloud: FastAPI, Docker, AWS EC2, PostgreSQL, Supabase

AI / NLP: Google Gemini API, Prompt Engineering

Tools: Git, GitHub

Concepts: REST APIs, Cloud Architecture, Agile/Scrum, Data Pipelines, Predictive Modelling, Technical Documentation

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- AWS Certified Solutions Architect – Associate (In Progress)
- AWS Academy Data Engineering
- Machine Learning For All – University of London
- Databases and SQL for Data Science with Python – IBM
- Introduction to Artificial Intelligence – IBM
- Data Structures and Algorithms – Microsoft
- MongoDB Developer Certification – MongoDB University
